

Are you new to Ancestry.com? Do you like the FamilySearch interface better? Do hints just freak you out? Are all those possible document matches overwhelming you? If you answered “yes” to one or more of those questions, this episode is for you. “Keeping It Orderly, Or Hygienealogy” is all about prioritizing the hints that you get from Ancestry for any given ancestor, and creating a plan of attack that lets you add best evidence to your tree. It lets you minimize confusion and maximize the data you draw from every record. It’s where you want to be. Give me 20 minutes, and I’ll give you some peace of mind.
